?

**Unfortunately 80% (or more) of the websites built by 'so called' Web Developers are built to fail. Why?**

Because they basically don't understand the psychology and structure behind what it takes to generate an amazing conversion rate.

This effectively means for all the visitors you might get to your site, the vast majority of them will end up leaving unsatisfied. The actual return you make on your investment will be very low, or possibly even nil.

And what makes things worse, is these poor unfortunate website owners are led to believe that the secret to a website's success is all about the traffic to the website, and improving their SEO, so they head off on a tangent and start spending loads of money on Adwords and other pay per click strategies, and then wonder a few months down the track why they've still had no response, no sales or inquiries from their website. Often times this leads the website owner into believing that websites just don't work, and that Adwords and other pay per click methods are a waste of money.

That belief couldn't be further from the truth! How would you like to learn and understand the closely guarded secrets of how some websites seem to convert their visitors into massive inquiries and new customers at the drop of a hat, generating hundreds and hundreds of leads on a weekly basis? Perhaps you'd also like to know with absolute confidence that the money you do spend generating visitors through Adwords, Facebook, and other forms of promotional marketing is actually now going to convert into new business inquiries on a regular basis. You're about to discover how to fix these problems permanently.
