## **QUEST FOR FIRE: A BRIEF HISTORY FROM THE DISCOVERY OF FIRE TO THE DISCOVERY OF FUSION** Dr. Marco Bitetto

The purpose of this book is to provide a brief discussion about the history of human science and technology.

This is done by first starting with the most profound discovery ever, namely the discovery of fire. With this discovery came the technology to preserve fire, start fires and use fires for lighting, cooking and warmth.

This book then shows the reader in a story like fashion a link between the discovery of fire to the atomic age. Where the reader is introduced to the technologies of atomic fission and ultimately atomic fusion.

It also covers the invention of thermionic devices to ultimately the invention of the first transistor. I details how such technologies have been used to radically change our lives forever.

This book finally discusses the next series of technologies that are coming rapidly into our lives and how these technologies will usher in a revolutionary new state of affairs for humanity as a whole.
